Appendix

GRS Laboratories examined 2 natural spinels of 3.42/3.19 cts, described in report number GRS2023-095732, that exhibited very good brilliancy and ideal proportions, making it worthy of receiving the GRS brilliancy designation of **vibrant**.

Vibrant is an attribute given to gemstones that display a high amount of color reflection as opposed to the separately considered category of color saturation.

A **vibrant** appearance is achieved through the skillful cutting of a gemstone to its optimal proportions, resulting in greater-than-usual weight loss and a maximized reflection pattern.
